BODY PACKS

The basis of all full-body packs is the soft-pack lounge. The pack is applied with you lying down and then you are wrapped in a towel so that your skin can absorb the positive effects of the particular pack. The warming blanket is heated to about 39 degrees, which causes the pores to open up quickly. All the packs moisturise and care for your skin. The effects achieved vary widely – from tightening to relaxing – depending on the particular ingredients used.

Hay flower pack

A true speciality among the packs! Lying on a bed of alpine hay, you are covered with an intensive evening primrose oil cream pack. It provides a deep moisturising and nourishing effect, regenerates and also counteracts the ageing process. The fragrant hay allows you to relax really well and you have the feeling that you are lying in a lush green mountain meadow.

Swiss pine pack

Another speciality among the packs! Lying on a bed of swiss pine, you are covered with an intensive evening primrose oil cream pack. It provides a deep moisturising and nourishing effect, regenerates and also counteracts the ageing process. The fragrant hay allows you to relax really well.

Cleopatra pack

The last Egyptian Queen is still the epitome of grace and natural beauty today. The Cleopatra pack counteracts the effects of environmental pollution on the skin and helps to restore the natural protective layer of the skin and to counteract dry skin. It is made of goat butter, jojoba oil, vitamin complexes and antioxidants and a few drops of Champagne perfume oil.

Tip: a peeling is the ideal preparation for the skin so that it can better absorb the active ingredients of the pack. We are happy to advise you personally.

CHANGE OF SCENE - JETPEEL - APPARATIVE COSMETICS

“Medical and cosmetic care for deep treatment with a glow effect.”

JetPeel is a gentle alternative to microdermabrasion. Using a technique from the aerospace industry, a medical water and gas mixture is applied painlessly with high pressure to the surface of the skin to remove redundant and aged skin cells. This is followed by a JetPeel lymphatic drainage, which gently removes retained water and toxins from the face. The skin becomes more

absorbent through this, so that the active ingredient – serum or hyaluronic acid – goes directly where it is needed. The effect is immediately noticeable.

Used for:

acne, age spots, anti-ageing, rings under the eyes, couperose, wrinkles, improved skin appearance for tired, pallid skin, skin smoothing and tightening.

- JetPeel promotes collagen production
- helps in the treatment of acne
- improves the appearance of scars

The skin feels fresher and much more plump already after the first treatment. A lasting effect is achieved after five to six treatments.
